

Air Quality Policy

NMAA Bylaw 7.6.23

During periods of poor air quality, the local AQI (Air Quality Index) should be monitored. The AQI for your current location and time can be located by entering your zip code into the [Airnow.gov](https://www.airnow.gov) website. Exposure to air should be managed more carefully for students with pre-existing lung or heart conditions. When the AQI rises above 100 schools should consider removing such athletes at risk from practice or competition. At AQI values above 150 serious consideration should be given to rescheduling the activity or moving it indoors if possible.
